- Rodenhouse Inc.
- Thermafiber®

Check with your local L&W Supply branch for availability in your market.

At L&W Supply, we consider ourselves an extension of your business. A trusted partner dedicated to helping your business grow by delivering the tools and service you need to succeed. We offer the broadest range of the best and most innovative products available today. Products that are stocked where you want and delivered when you want. All by a company that leads the industry in its commitment to safety. To learn more about L&W Supply’s commitment to safety visit www.lwsupply.com/safety and download the Jobsite Delivery Checklist and watch the safety video.

In addition, our sales and service teams participate in extensive technical training. This allows them to provide more than just outstanding customer service—they also act as industry consultants, keeping you up to date on building codes and standards, sustainability trends and more. It’s why, at L&W Supply, you’ll always receive the kind of attention you’d expect from a local supplier, backed by the support and network you can only get from more than 140+ nationwide branches.
If you’re not lifting SHEETROCK® Brand UltraLight Panels, what are you lifting?

Introducing the expanding portfolio of SHEETROCK® Brand UltraLight Panels. Up to 30% lighter than standard drywall panels and easier to lift, carry and install. These revolutionary panels are easing the burden and enhancing productivity for an entire industry. And they’re only from USG, The Leader in Lightweight Innovation™.

SHEETROCK® Brand UltraLight Panels FIRECODE® 30 — 5/8”

These panels feature an engineered core encased in proprietary 100% recycled face and back papers for a high strength-to-weight ratio composite design and meet or exceed ASTM C1396 and building code requirements for 5/8” gypsum wallboard (non-Type X).

• An optimally designed lightweight alternative to standard 5/8” type X panels*
• UL classified for use in 30-minute single-layer wood- and steel-framed assemblies and one-hour double-layer steel-framed assemblies (UL design U407)
• Strength and impact resistance is comparable to standard 5/8” type X board

SHEETROCK® Brand UltraLight Panels — 1/2”

• Meets all ASTM and residential building code requirements
• Can be used on walls and ceilings for superior sag resistance
• Stronger pound for pound than traditional 1/2” drywall
• The first and only 1/2” lightweight panel building code approved for all ceiling installations
• Complies with International Building Code and ASTM C1396 requirements for 1/2” gypsum wallboard and 1/2” sag-resistant gypsum ceiling board, ICC Evaluation Service compliant under ESR-3365

* A lightweight alternative optimally designed for use where standard 5/8” type X panels are not required to meet one-hour fire rating or specific sound performance applications.

For more information, visit www.TheWeightHasBeenLifted.com or contact your local L&W Supply branch for additional product information and availability.
PROPPINK EcoTouch® Insulation

PROPPINK EcoTouch® Insulation, Easier to handle. Faster to install. It’s insulation made better than ever before.

Owens Corning PROPPINK EcoTouch® Insulation installs easier and faster than other fiberglass insulation products¹, helping you get more done in less time. It’s easier to cut and split with less dust¹, allowing installers to properly insulate irregular cavities and around common obstructions with ease. PROPPINK EcoTouch® insulation offers exceptional stiffness and recovery characteristics, helping you achieve high-quality, inspection-ready installs with no additional handwork¹. No wonder EcoTouch® insulation is rated #1 for handleability and ease of installation by contractors, and is preferred by 2 out of 3 professional installers over all other brands¹.

Features & Benefits

- EXCELLENT THERMAL PERFORMANCE
  Available in a wide range of R-values (R-11 to R-38) and thicknesses to meet most thermal specifications.

- EFFECTIVE ACOUSTICAL CONTROL
  Enhances interior noise control by improving the Sound Transmission Class (STC) of walls and floor/ceiling assemblies.

- ENVIRONMENTALLY RESPONSIVE
  Certified to include a minimum of 65% recycled content², GREENGUARD Children & Schools certified and verified to be formaldehyde free.

- PROPPINK EcoTouch® Insulation enables buildings to achieve energy efficiency and green building certifications including the Environmental Protection Agency’s Energy Star® standard, and the U.S. Green Building Council’s Leadership in Energy and Environmental Design (LEED) certification.

ROXUL AFB® Insulation

Premium stone wool batt insulation that fights both fire and noise.

Roxul AFB is a lightweight, semi-rigid batt insulation specifically designed for commercial steel stud interior wall and floor applications. Made from natural basalt rock and recycled slag, AFB stone wool insulation is a sustainable product that provides superior sound absorbency and fire protection for overall occupant comfort and safety. Having a higher density than typical batt insulation, AFB cuts easily for increased installer productivity and an optimal fit for exceptional product performance. That’s why AFB is quickly becoming the insulation of choice for today’s green builders in commercial and institutional construction.

AVAILABILITY:
AFB is available from 1” to 6” thicknesses in ⅛” increments. AFB is specifically made for both 16” and 24” on center stud spacing.

Features & Benefits

- Specifically designed for UL Rated assemblies
- Fire-resistant, does not develop smoke or promote flame spread
- Will not absorb water or hold moisture, therefore maintaining its shape in the wall cavity
- Higher density batts ensure a superior, sag-free friction fit
- Fast and easy to install, use a serrated knife to cut around electrical boxes, wiring and pipe

FREE* KNIFE WITH 5 AFBs

Have a more productive install! When you buy 5 bags of Roxul AFB at your local L&W Supply branch you’ll receive a FREE Stone Wool knife. 1 knife per customers while supplies last. See your local branch for details.

¹ According to a 2010 trial conducted in Toronto, Canada, by Ducker Worldwide on behalf of OC Insulating Systems, LLC.
² Unfaced EcoTouch® fiberglass insulation certified by Scientific Certification Systems to have a minimum of 65% recycled glass content, with at least 42% post-consumer recycled and the balance pre-consumer recycled glass content.

For more information, visit http://insulation.owenscorning.com/professionals/insulation/applications/floors-walls/insulating-exterior-walls or contact your local L&W Supply branch for additional product information and availability.

For more information, visit www.roxul.com or contact your local L&W Supply branch for additional product information and availability.

* Offer expires 7/31/13 or while supplies last. Offer redeemed at participating L&W Supply locations only. Cannot be redeemed for cash. Void where prohibited by law. Qualifying purchases must occur between May 1, 2013 to July 31, 2013. Invoice must be from a participating L&W Supply location.
USG Drywall Suspension System

The USG drywall suspension system is a pre-engineered drywall ceiling system specifically created to simplify the design and construction of flat and curved drywall ceilings. Custom curved main tees combine with our family of straight tees to give you the ability to design breathtaking drywall ceilings simply.

Additionally, The USG drywall suspension system Estimator is available to help you design domes, vaults, and other curved surfaces electronically. This intuitive, online tool can instantly generate a complete bill of materials and detailed installation instructions based on the dimensions you input.

For more information, go to www.usg.com and select Resources > Online Tools.

Features & Benefits

- This unique, pre-engineered system can reduce installed costs up to 40% versus conventional cold-rolled channel or steel stud drywall ceiling installation.
- 12-gauge wire used. Easier to work with than the 9-gauge wire commonly provided with systems by other manufacturers.
- More than 30 UL-listed fire-resistant designs (the most designs in the industry) are available.
- Easily transitions from soffits, flat and curved surfaces; also transitions to acoustical ceilings.
- Suitable for interior and exterior applications.
- Easier screw penetration on all components.
- USG Drywall Suspension System components come with a 10-year warranty and a lifetime limited warranty when you use SHEETROCK® gypsum panels.

USG Wall-to-Wall Drywall Suspension System

The Wall-to-Wall Drywall Suspension System is a pre-engineered drywall ceiling system specifically created to simplify the design and construction of conventional flat drywall ceilings in corridors, small rooms and other similar spaces with spans of less than 14 feet. This framing solution is easier to work with than black iron and furring channels or drywall studs, and it helps to reduce labor costs.

APPLICATIONS: Condominiums and Apartments, Healthcare, Education, Hotels, Dormitories and Offices

Features & Benefits

- Simplifies design and construction for corridors and small rooms.
- Eliminates hanger wires and cross tees for unsupported spans up to 8’ with 1/2” drywall and 7’-6” with 5/8” drywall.
- Lowest installed cost system for corridors and small rooms.
- Pre-engineered components allow easy transition between ceiling types and elevations.
- G40 hot-dipped galvanized system suitable for interior and exterior applications.
- Standard and custom lengths available.
- Manufactured in accordance with ASTM C645.
- Industry-leading spans.
- Fulfills requirements for seismic categories D, E and F.

For more information, visit www.usg.com/ceilings or contact your local L&W Supply branch for additional product information and availability.
*Sheetrock® Brand UltraLightweight All Purpose Joint Compound* is an exceptionally lightweight, latex-based compound used for embedding joint tape as well as filling, leveling, and finishing over gypsum panel joints, fasteners, bead, and trim.

Nearly 40% lighter than conventional weight joint compounds, this product offers good open time and improved slip while delivering excellent bond over bead, trim, and fastener concealments. It can be applied by hand or machine and despite its tough surface, it sands easily.

**Features & Benefits**

- Up to 40% lighter than conventional weight compound
- Excellent adhesion for consistent taping performance
- Delivers a tough finish yet sands easily
- Flexible enough to use with hand tools or mechanical finishing equipment
- Easier flow and less effort during application
- The compound meets ASTM C475.

For more information, visit [www.TheWeightHasBeenLifted.com](http://www.TheWeightHasBeenLifted.com) or contact your local L&W Supply branch for additional product information and availability.
**Sheetrock™ Brand Tools**

Sheetrock™ Brand Tools were developed to provide the professional drywall installer with high-quality, ergonomic, durable tools. Sheetrock™ Tools are versatile and comfortable, which allows professionals to finish the job efficiently.

### Tools

**Classic® and Matrix®® Finishing Knives**
- Enlarged hammer for striking and writing
- Available in blue steel, polished carbon steel and stainless steel

**Classıc® and Matrıx®® Stainless Steel Mud Pans**
- Contoured bottom and continuous heli-arc weld for easy mixing and cleaning
- Reinforced stainless steel band for added durability (Matrix® only)

**Outsıde Corner Rollers**
- Durable stainless steel construction
- Nonslip soft-grip wheels
- Bumpers to prevent corner damage
- Includes 4-foot fiberglass pole

**T-Square**
- 1/2"-tall finger guard to protect against accidental blade jumps
- Heavy-duty 3/16" aluminum blade
- Highly visible green finish

**Jab Saw**
- Lighter, soft-grip handle designed for maximum comfort
- Aggressive tooth design for fast cutting
- Sharp tip for plunge cutting

**Corner Bead Hopper**
- Hinged lid protects joint compound from jobsite debris
- One-piece gate design allows for quick adjustments
- Multiple gate profiles designed for inside and outside corners
- Side and top handles for easy transportation
- Designed for use with paper-faced metal or paper-faced plastic bead

**Mud Pan Grip**
- Nonslip surface
- Fits any size stainless steel mud pan

**Mud Mixer**
- Durable steel construction
- Balanced and self-centering to minimize bucket gouge
- Tri-fold mixing action folds material from sides, top and bottom

### FREE MUD MIXER!

Purchase $50 worth of Sheetrock™ Tools and receive one FREE 24” mud mixer from Sheetrock Tools.*

*Offer expires 8/31/2013 or while supplies last. Offer redeemed at participating L&W Supply locations. Cannot be redeemed for cash. Void where prohibited by law. Qualifying purchases must occur between May 15, 2013 to August 31, 2013. Invoice must be received by September 30, 2013. Limit one free Sheetrock Tools 24” mud mixer per person and per invoice.

For more information, visit www.usg.com or contact your local L&W Supply branch for additional product information and availability.
NO-COAT® Structural Laminate Drywall Corners
ULTRAFLEX® & ZOOMA-FLEX® Roll Products

NO-COAT flex roll products are ideal for off-angles, both short and long runs. Wide flange covers large gaps and poor framing. Flexible hinge fits any inside or outside corner angle and creates crisp, straight lines. Won’t crack or peel.

ULTRAFLEX® 450
The world’s #1 flex product has earned the reputation for delivering perfectly straight lines for challenging off-angles and long spans, while withstanding settling, shrinking lumber, seismic movements and temperature variations.

APPLICATIONS
• General-use areas
• Long peaks (spans > 10 feet)
• Vaulted, cathedral, tray ceilings
• Inside/outside corners of any length

PRODUCT DETAILS
4.5" wide x 100’ roll

ULTRAFLEX® 325
ULTRAFLEX 325 offers the same durability and strength as ULTRAFLEX 450, with a narrower flange width that makes it ideal for shorter off-angle spans.

APPLICATIONS
• Short runs of less than 10 feet
• Vertical off-angle applications, stand-ups
• 90º inside/outside corners

PRODUCT DETAILS
3.25” wide x 100’ roll

ZOOMA-FLEX®
ZOOMA-FLEX is the only flex that runs through an Ames Bazooka® and Automatic Taper Tool

APPLICATIONS
• Short runs (spans < 10 feet)
• Inside off angles
• 90º inside corners

PRODUCT DETAILS
2.125” wide x 100’ roll
2.125” wide x 200’ roll

ULTRATRIM® & ULTRA ARCH® Stick Lengths
Engineered to withstand severe impacts, settling and seismic movements without cracking, denting, chipping or peeling. Precut, easy-to-install lengths deliver perfect corners in record time.

ULTRATRIM®

INSIDE 90
APPLICATIONS
• 90º inside/outside corners

PRODUCT DETAILS
8’, 9’, 10’, 12’ stick lengths
50 sticks per box

OUTSIDE 90
APPLICATIONS
• 90º outside corners

PRODUCT DETAILS
10’ lengths
Custom lengths available
50 sticks per box

1/2”, 5/8” L TRIM
APPLICATIONS
• Window returns
• Door enclosures
• Drop ceilings
• Protective edging

PRODUCT DETAILS
10’ lengths
Custom lengths available
50 sticks per box

3/8” & 3/4” BULLNOSE
APPLICATIONS
• 90º outside corners

PRODUCT DETAILS
8’, 9’, 10’, 12’ stick lengths
50 sticks per box

135º BULLNOSE
APPLICATIONS
• 90º outside archways
• 90º bullnose archways

PRODUCT DETAILS
10’ lengths
Custom lengths available
10 sticks per box

1/2”, 5/8” L TRIM
Perfect for trimming ceiling, window or door jamb corners.

3/8” & 3/4” BULLNOSE
Made with the strength and durability of NO-COAT’s SLAM design with a superior aesthetic finish.

ULTRA ARCH®

OUTSIDE 90
APPLICATIONS
• 90º outside archways
• 90º bullnose archways

PRODUCT DETAILS
10’ lengths
Custom lengths available
10 sticks per box

135º BULLNOSE
A unique tape-on design allows for dramatic labor savings and requires less mud than competitors. No more awkward stapling and time-consuming spraying.

For more information, visit www.no-coat.com or contact your local L&W Supply branch for additional product information and availability.

**Award Winner! BlazeFrame®**

BlazeFrame products were recently recognized in the November 2012 issue of Architectural Products magazine as a Product Innovation Award winner. The combination of ease of installation and quality system capability made it an easy choice. A component of this award winning lineup is the BlazeFrame Control Joint Backer (CJB).

For more information, visit www.clarkdietrich.com or contact your local L&W Supply branch for additional product information and availability.

FastBridge™ Clip

ClarkDietrich FastBridge Clip connectors are used to secure U-Channel* to wall studs for lateral bridging. The friction fit design allows for the use of one screw for connection of the clip to the U-Channel.

**ASTM & CODE STANDARDS**

• ASTM A653
• MSDS & Product Certification Information is available at www.clarkdietrich.com

**ORDERING INFORMATION**

• Coating: G-90
• Length: 3.531"
• Gauge: 18 Gauge Light Duty
14 Gauge Heavy Duty
• Packaging: 200 Pieces/Carton

*Note: U-Channel should not be used in bridging applications when the stud width exceeds 6".

For more information, visit www.clarkdietrich.com or contact your local L&W Supply branch for additional product information and availability.
Curved-Right™ Pre-Curved Cold-Formed Steel Framing

Our expertise in pre-curved cold-formed steel framing provides you with the most cost-effective, accurate, and time-saving solution to build curved surfaces to your exact specifications.

No matter if you’re building arcs, splines, ellipses, free-form 3D ruled surfaces or compound shapes, we’ll pre-curve steel framing components to assure the curve will be smooth and uniform.

Features & Benefits

- Pre-curved CFS profiles, box beams and unitized panels
- Material take-offs
- Manufactured in a controlled environment
- Labeled and delivered to the jobsite ready to install
- Detailed installation drawings
- Consistent, accurate pre-curved profiles
- Labor costs are minimized
- Structural and non-structural

Serious Energy—QuietRock® ES

QuietRock ES makes building for noise control easy and straightforward. Utilizing the EZ-SNAP technology, QuietRock ES is the only type X sound-damped drywall that eliminates the use of paper and metal in the core, yielding faster and more reliable soundproofing installation. Unlike traditional sound methods like resilient channel, it cannot be easily short-circuited in the field, providing exceptional acoustic performance at a lower overall cost. It hangs and finishes just like standard drywall—no saw, same screws, same tools and no additional training needed. To prevent noise leaks and maximize acoustic performance, QuietSeal is used around the perimeter of the walls and seams not backed by a stud. Apply QuietPutty at any penetrations such as electrical outlets and light switches. Assembly must be airtight for the most reliable soundproofing.

Features & Benefits

- Powered by EZ-SNAP for true score and snap
- 4X easier to snap than other acoustic drywall brands
- Only 5/8” thick providing more livable floor space vs. soundboard or RC-1
- Excellent application for curved walls—bending radius equivalent to 3/8” gypsum
- Outperforms multiple layers of drywall
- Abrasion-resistant paper
- Lab tested up to STC 60
- Load bearing, type X, 1 hour, fire rated

For more information, visit www.quietrock.com or contact your local L&W Supply branch for additional product information and availability.

DeWALT Power Tools

DeWALT Power Tools are jobsite-tested, not just to prove they’re tough, but to make the job easier. Switches, adjustments, shape, weight, torque and handles are all designed with the professional contractor in mind, which is why so many professional contractors choose DeWALT.

Features & Benefits

- DeWALT brushless motor delivers up to 57% more run time over brushed
- XR™ Li-Ion batteries with fuel gauge provide 33% more capacity over standard packs
- Compact (5.55” front to back), lightweight (2.9 lbs) design fits into tight areas
- Three (3) LED lights with 20 second delay after trigger release provide visibility without shadows
- One-handed loading 1/4” hex chuck accepts 1” bit tips
- Belt hook included for portability

DEWALT 20V MAX* XR LITHIUM ION BRUSHLESS 1/4” IMPACT DRIVER KIT (DCF886D2)

ENTER TO WIN THE ULTIMATE PACKAGE OF DEWALT TOOLS

Join our mailing list for a chance to win the ULTIMATE contractor prize package of DeWALT tools! We’ll keep you up to date on the latest products, promotions, news and events. A total of two prize packages will be awarded. Visit www.lwsupply.com to enter and for more details.

PRIZE PACKAGE INCLUDES:

2 – 14” Chop Saw w/ QUIK-CHANGE™ Keyless Blade Change System (Model: D28715)
4 – 4,000 rpm VSR Drywall Screw Gun with 50 ft. Cord and Twist Lock (Model: DW272WT)
1 – 4-1/2” (115mm) Small Angle Grinder (Model: D28402)
1 – Worksite Charger/Radio (Model: DC012)
2 – 10 Gallon HEPA Dust Extractor with Automatic Filter Clean (Model: DWV012)
2 – 14” Diamond Chop Saw Wheel (Model: DW8500)

Estimated retail value of package: $4,000.

* No purchase necessary to enter to win. Offer valid May 15, 2013–August 31, 2013. Limit 1 entry per person. Must be 18 years of age to be eligible. Visit www.lwsupply.com for full contest rules and details.

For more information, visit www.dewalt.com or contact your local L&W Supply branch for additional product information and availability.

PLS Lasers

Pacific Laser Systems (PLS) was founded to develop and manufacture accurate, portable, durable and affordable laser alignment tools for the professional contractor. Today PLS is known around the world as the professional standard for hand-held laser tools. With over 20 variations of tools emitting a combination of points, lines and rotary, PLS can address any layout task that a commercial drywall or acoustic contractor will be faced with. All PLS laser tools are self-leveling, compact and durable laser alignment tools.

Grabber® SuperDrive® Collated Screw Guns

Grabber SuperDrive® works like nothing you’ve ever used before. Drive one screw and the indexing head automatically advances to the next screw in the strip, locking it in place, ready to be driven. Save even more time by keeping the screw gun under full power as you drive one screw after another. No wasting time powering down each time you finger in another screw. You can drive nearly twice as many screws with SuperDrive® as you can hand feeding them.

SUPERDRIVE® 80

SuperDrive® 80 features a small, lightweight head for driving framing screws, drywall screws, sheathing screws and more. The small size and narrow width allows access to tight spaces. The tool kit comes with the SuperDrive® 80 series tool, a Rocker 4000 RPM screw gun and either a drywall clip or feed track depending on your needs. A 22” extension is also available.

FEATURES

• Compact
• Lightweight
• Low profile
• 50 screws per strip
• Use for any screw application from 3/4” to 1-1/4”
• Fine depth control adjustment
• Drywall or feed track options
• 4000 RPM Grabber Rocker screw gun

RECOMMENDED FASTENERS

Scavenger® Head GRABBER®
Drywall screws (C308)
Ideal for drywall to wood attachment.
• High grade steel and sharper threads for better holding power
• Reduces paper burrs

Scavenger® Head Streaker®
Drywall screws (C368S)
Ideal for drywall to wood and light gauge metal attachment.
• High grade steel and sharper threads for better holding power
• Reduces paper burrs

Scavenger® Head Driller
Drywall Screws (C14SZ)
Ideal for drywall to heavy gauge steel (20-14 ga.) attachment.
• Extra sharp drill point for quick starting and penetration
• Reduces paper burrs

Scavenger® Head Streaker (CFP101875LYZ)
Ideal for metal to metal framing (20-12 ga.) applications.
• Exclusive LOX® recess for better driving and fewer cam-outs
• Low profile head design for better holding power and clearance

Recommended Applications

• Drywall to wood and metal
• Sheathing to wood and metal
• Metal to metal framing

Fastening Systems for Continuous Insulation (ci)

EZ-DRIVER CHUCK ADAPTOR
- Holds screw securely for effortless drilling, even into steel
- Fits ALL drill guns
- Depth adjustment for flush washer profile
- For all Grip-Deck® screw lengths or drives

GRIP-LOK® AUTO-FEED BULLSEYE™ FASTENING SYSTEM
- Rapid attachment into steel or wood (up to 3 x faster!)
- Nose cup auto-centers on washer
- Depth adjustment for flush mounting
- Allows for one-hand driving
- Also great for commercial building wrap
- For use w/ 2” dia. Thermal-Grip® ci washers & Grip-Deck® ci collated screws

GRIP-DECK® CI SELF-DRILLING SCREWS
- Lengths for all insulation thicknesses
- Hardened drill tip for tapping into steel
- Premium corrosion protection
- Available collated or in bulk

THERMAL-GRIp® CI PRONG WASHERS
- TESTED—RECOMMENDED—APPROVED
- Designed to seal fastener penetration
- 2” solid cap design improves performance
- Available with prongs for pre-spotting into XPS, polyiso, rock wool, etc.

Thermafiber® FixtureShield®

Thermafiber FixtureShield is made from 70% recycled content Thermafiber mineral woolboards and is designed to maintain fire rating in UL listed suspended and gypsum ceiling systems. FixtureShield kits provide the protection that is required in fire rated floor/ceiling and roof/ceiling assemblies according to the IBC Building Code, Section 711.4.

The patented design of FixtureShield reduces installation time, offers energy saving R-value and improved sound control. Each kit comes with all necessary components: pre-fabricated Thermafiber insulation, insulation pins, including standoff pints to maintain air space requirements. Standard kits are available for 24” x 24” and 24” x 48” light fixtures. Custom sizes are available for other fluorescent fixtures, can lights, and other types of fixtures. FixtureShield kits also contribute to LEED® credits.

Features & Benefits
- Meets code requirements
- Quick and easy to install
- Lightweight
- Patented design
- Listed in 15 UL fire-rated assemblies
- Sound control and privacy
- Conserves energy

For more information, visit www.thermafiber.com/fixtureshield or contact your local L&W Supply branch for additional product information and availability.
